Devil's Line

By Ryo Hanada Genre: Manga; Horror; Romance

Formats available: Print

Location: F DEVILS GRAPHIC

Great new series for manga lovers!!! This is one of those books I picked up on a whim and was pleasantly surprised by how good it was. Tsukasa, a college student living in Tokyo, is attacked one night by a devil , or vampire (the terms seem interchangeable in this story), but is rescued by Anzai, a half-devil himself and a member of a secret police task force that specializes in crimes involving devils. After Tsukasa's rescue they begin to form a friendship which inevitably leads them to wanting something more, which seems to be practically impossible.

Now this might sound a bit like Twilight (and I would recommend it to Twilight fans), but give it a chance. It has a much darker and more realistic feel, and the romance is less "all-consuming" and much more simple and relatable.

The Ghosts of Belfast

By Stuart Neville Genre: Mystery; Thriller

Formats available: Large Print

Location: F NEVILLE LGPRINT

The Ghosts of Belfast was Neville's first novel. It is a true thriller, from start to finish—and not for the faint-hearted. Set in Northern Ireland as "the troubles" between Catholics, Protestants, and the British are winding down, there are still Irish rebels who are bitter, as well as politically corrupt. Gerry Fegan is haunted by the ghosts of 12 people he killed. In order to appease his victims, he must kill the men who gave him his orders. In the midst of this brutality, Fegan falls in love with a woman who has a young daughter, both outcasts from their Irish families. The book is a true nail-biter to the end.
